How these appointments help

Dental health examinations provide:

- Clinical examination to catch developing problems early.
- Checking for signs of oral cancer for early detection.
- X-rays, where clinically necessary, for an in-depth examination of your oral health.

Hygiene appointments provide:

- Professional removal of harmful plaque via Guided Biofilm Therapy.
- Gentle Airflow® treatment for the removal of daily teeth stains, e.g. tea, coffee, fruit, berries and red wine.
- Education to support the long term care of your teeth and gums.

We believe this is the complete package to maintain good oral health for you and your family. We recommend joining to help reduce the risk of expensive restorative treatment in the future.

Please speak to any member of the team if you'd like more information or for details on how to register you or your child.
